

**Northern Essex Community College**  
**Department of Science, Technology, Engineering, and Mathematics**  
**BIO 121 OFB (CRN: 7792) – Anatomy and Physiology I**  
**Fall 2024**

---

## Welcome

Welcome to Anatomy and Physiology I. My name is Noel Ways. I am a biologist by training, and over the past 35 years, I have had the privilege to teach this course hundreds of times. Oddly, it never gets old. The material is the same, but what breathes life into the classroom every semester is the student. We work together, and we learn together. As you begin your journey into this segment of your academic career, I am here to help guide and encourage you to be the best you can be. Welcome to the class.

---

## Course Information

**Name:** Anatomy and Physiology I

**Course Number:** Bio 121 OFB **CRN:** 7792

**Credits:** 4 Credit Hours. 3 Lecture hours, 2 Lab hours

**Dates:** September 4 – October 26 (~8 weeks)

-----  
**Presentation Modality:** Online

-----  
**Prerequisites:** BIO 115 Physiological Chemistry or CHM 111 Introduction to Chemistry or higher or high school chemistry in the past five years.

---

## Instructor Contact Information

**Instructor:** Noel Ways

**Email:** [nways@necc.mass.edu](mailto:nways@necc.mass.edu)

**Virtual Office Hours:** As our schedules vary dramatically from one person to another, specific “office hours” that work for all can be challenging. If you would like to meet, email me, and we will schedule a meeting using the Zoom video conferencing software program during a mutually acceptable time. On Blackboard, you will find a “Zoom Office Hours” link.

---

## General Course Description

---

Anatomy and Physiology I is intended to provide a foundational knowledge base for students preparing for a career in the allied health professions. Students taking this course frequently end up in our medical facilities with substantial responsibility for patient health and safety. This course is setting the stage for a successful and responsible life-long career. This an online asynchronous class where students work independently of classroom instruction.

## Collage Course Description

The basic principles of chemistry are reviewed and the basic principles of biology are introduced. These are followed by an introduction to the study of the structure and functioning of the human body. Systems covered are integumentary, skeletal, muscular and nervous. Emphasis will be placed on the interrelationships among the systems. Related topics such as diseases of the systems will be integrated where applicable. Laboratory work will include experiments, dissection, microscope work, and the study of charts and models.

---

## General Course Objectives

---

As we endeavor to prepare you for a career in the allied health professions, specific goals and benchmarks have been established towards this aim. Looking towards this end, the general course objectives listed below expand on the overall course description. As the flow of the course ensues, you will find that the course topics and laboratory work will align with these objectives.

- Develop a working knowledge of anatomical terminology applicable to writing medical reports and reading professional literature associated with their discipline.
- Develop an understanding of how homeostasis is maintained through negative and positive feedback systems
- Distinguish between essential chemical processes and molecular classifications in preparation for further discussion of physiological concepts in both A&P I and A&P II, and clinical instruction.
- Compare and contrast the functional relationships of major cellular organelles.
- Compare and contrast transport mechanisms for substances entering and exiting through the cell membrane.
- Critique different tissues found in the body according to their function-location relationships.
- Differentiate between the regions of the Integumentary System and their functions.
- Write the process of deep wound healing while taking into account the logical progression of healing events through time.
- Relate the structural makeup of osseous tissue to healthy bone maintenance.
- Diagram the homeostatic mechanisms involved in the maintenance of normal blood calcium levels.
- Compare and contrast the stages in the process of healthy bone growth.
- Develop a working knowledge of the body's major bones and the numerous processes, fosses, etc. of the same.
- Categorize the major articulations of the body, both structurally and functionally.
- Relate the anatomy of muscle tissue to how muscles contract.

- Predict the amount of ATP produced per one glucose molecule based upon an illustrated
- Predict the actions of various muscle contractions based upon their location, origin, and insertion.
- Compare and contrast the major parts of the central nervous system according to their essential functions.
- Examine the process of nerve impulse propagation.
- Produce illustrated diagrams of select spinal reflexes.
- Distinguish between the different parts of the human brain and their respective functions.
- Compare and contrast how the different parts of the central nervous system work in a coordinated manner.
- Predict the levels of both sympathetic and parasympathetic nervous activity under various degrees of stress and rest.

---

## Intensive Core Skill Objectives

---

In addition to the General Course Objectives listed above, Anatomy and Physiology I has been identified by the college as both Science Intensive and Quantitative Intensive. As such, additional objectives unique to this designation are listed below which help qualify the above General Course Objectives. Below is a College statement regarding these objectives:

### Intensive Core Skill Objectives

BIO121 has been designated as a **Science and Technology Intensive** course. Students will have the opportunity to develop knowledge and/or skills concerning the ability to:

- Demonstrate basic knowledge of major concepts related to science and technology. This includes current theories, historical and data trends, and empirical findings.
- Be able to critically read, evaluate and interpret research findings and/or theories and draw reasonable conclusions. This includes supporting or rejecting a hypothesis or theory, analyzing case studies, and providing alternative explanations.
- Transfer, adapt, and apply prior knowledge to science and technology related issues and develop new understanding.
- Be able to identify reliable sources of information from a variety of resources including those from the library, websites, journals, magazines, newspapers, and other media.

BIO121 has been designated as a **Quantitative Reasoning Intensive** course.

Students will have the opportunity to develop knowledge and/or skills concerning the ability to:

- Graphical and statistical analysis, such as trends over time.
- Descriptive and/or inferential statistics.
- Data analysis.
- Experimental design and creation of data sets with simple evaluation.
- Application of Mathematics in context.
- Reading, Writing, and/or Critical thinking in context with numbers.
- Development of mathematical solutions and equations to solve problems in context.
- Discussion of multiple interpretations of a single data set.
- An emphasis on the difference between cause and effect versus correlation data.
- Proportional reasoning in the context of real situations.

---

## Course Materials

---

- **Textbook (Required):** Anatomy & Physiology, by OER Commons  
Note, that the textbook is obtained as a free online resource, and can be accessed at:  
<https://www.oercommons.org/courses/anatomy-and-physiology-4/view>
- **Videos:** YouTube Lecture Videos with Closed Caption
- **Handouts:** Accessible and downloadable PDFs
- **Internet:** Websites that feature animations explaining complex physiology

Aside from the required text, other course material resources are linked on Blackboard.

---

## Course Presentation – 8 weeks, Asynchronous/Online Modality

---

This course is delivered Asynchronously online, where the students work independently outside a traditional classroom and laboratory setting. The delivery of course curricular content will utilize resources available through Blackboard and the instructor’s website, to which Blackboard is linked. The course content is organized into modular components to facilitate accessibility, clarity, and organization to this process.

Each module will have the following components:

- **Learning Guide** - A Learning Guide will guide the student through the supportive readings, videos, animations, and other media under consideration for any particular lecture/module. This document provides tips on approaching the material and issues of specific concern relating to the associated exam.

- **Lecture Outline** - A lecture outline organizes the course content and guides the student through the material in preparation for associated assessments. In addition, the outline is designed for student note-taking.
- **Handouts** – Handouts highlight points in the lecture sequence requiring special attention, comment, or visual support. These tend to revolve around more complex physiological topics.
- **Videos Support** - Videos of the lectures will follow a lecture outline closely. The goal of this media is to cover all content, both in the lecture setting as well as in the laboratory.
- **Laboratory** - In a traditional educational setting, the laboratory lends itself to a “hands-on” approach to understanding course content. As this course has a laboratory component but is entirely online, rich image banks compensate for this aspect with accompanying video support.
- **Exams** are usually given on a module-by-module basis and are administered on Blackboard. The exams cover material on the outlines, handouts, and videos. The exams are noncumulative, but any lecture topic assumes a working knowledge of previous lecture topics.

For additional details of the module week, see “Course Walkthrough” in the Getting Started folder on Blackboard.

## Workload for a 8-week Accelerated Online Course

We all come from different backgrounds and have varying employment obligations, family relationships, and responsibilities that must be maintained. With the various pulls on our time and resources, scheduling another major activity into one's daily routine can be challenging. Scheduling several hours daily for study can be a daunting prospect for some. However, this must be looked at immediately and requires a quality decision to ensure success.

As this course endeavors to cover a typical 16-week semester course in 8 weeks, the course is accelerated, and therefore, students must anticipate 6 hours of study daily to master the material. This is highly individualistic, but it is crucial to determine your unique learning requirements.

I also encourage you to talk to those important in your life about your educational needs at this juncture in your career. I would encourage you to look carefully at all the time-demanding activities in your life and make appropriate adjustments in light of your career aspirations. The word "priorities" comes to mind here.

## Assignments

Anatomy and Physiology I is a content-heavy course. Your primary assignment for each lecture topic is to build for yourself a foundation that will carry you through the rest of your developing career. So, with the beginning of a module/lecture topic, your assignment will be to gain a working knowledge of the material presented.

Also, as Anatomy and Physiology I is a laboratory course, some topics are presented and assessed more than once, once in a lecture context and the other in a laboratory context. For example, we will discuss histology in a lecture context and have an appropriate assessment. We will also study histological samples, which are assessed using another assessment format, the laboratory practical, where the material is presented entirely visually. Having alternative methods of studying the material and alternative assessment forms provides students with different avenues to access the content, demonstrate mastery, and reinforce important topics.

To begin the learning process, start with the **Learning Guides**. These documents will provide insight into approaching the material on a module-by-module basis and point out issues that require special attention or preparation. The lecture outline will then systematically guide you through the text and lecture content. If something is on the outline, you need to know it; if it is not, you are not responsible for it, even if it is in your text. Handouts and videos will supplement and reinforce key concepts.

Regarding the **Video Support**, I will talk through the lecture content closely following the outline. Note, if something is on the outline you are responsible for it, even if I do not discuss it. Nevertheless, it will require TIME to review the outlines, view associated videos, and study the handouts to understand the material. Regarding laboratory material, mastery of the anatomical characteristics of tissue, bones, organs, etc., and associating appropriate functions with them will be necessary.

---

## Exams and Makeup Work

---

Exams are to be taken on Blackboard on the day designated on the course schedule. Exams are designed to demonstrate your mastery of the material presented and therefore are to be done individually and without the support of notes, text, or other resources. So, there is an honor system here. The exams are also timed. You will have enough time to read the question, pause, and put down an answer. So, in order to make sure that this process goes well, master the material well before the exam date. Also, there is no backtracking, and the exams must be done in one sitting.

Exams consist of a variety of question types listed below. For details, see the “Assessments” document online.

- True and False
- Matching
- Fill in the Blanks
- Illustrations
- Guided Essays
- Short Answers

**Makeup Exams and Documentation** - Makeup Exams are to be avoided! But if a makeup is needed, documentation is required to certify that the need is legitimate. If documentation is not presented, a makeup is still permitted, but an adjustment to the grade is made at the instructor's discretion. This adjustment typically reduces extra points that would otherwise bolster your grade. You will never get a grade lower than your earned grade. But if there is to be a makeup, this task should be accomplished within a week that the student returns to school. Contact me so that a time and a date can be coordinated.

Throughout the semester, I will be contacting you on a weekly/biweekly basis to offer you advice, provide comments, and give reminders. If your questions have class-wide import, the questions may be answered and shared with the class. The best place to ask questions is the "Student Interaction Board" on blackboard; therefore, all students will profit from the questions and the answers. Another venue may be scheduling a meeting using Zoom. Students are also encouraged to form online study groups. I have found that students who study together and talk through the material tend to excel.

Weekly scheduled class times provide opportunity to provide guidance, answer questions, and interact in a classroom setting. Beyond this, email and blackboard announcement will be provide a platform for the answering of questions. Another venue may be scheduling a meeting using Zoom. Students are also encouraged to form online study groups. I have found that students who study together and talk through the material tend to excel.

---

## Communication and Interactions

---

### **Blackboard**

Please make sure to log in to the Blackboard site daily. Announcements, class resources and all assessments will be handled through Blackboard. I will also regularly broadcast emails to the class through Blackboard. In such cases, Blackboard will send the email to your NECC student account. If you wish, you can change which email account these messages are sent to in your Blackboard settings.

### **Email**

Please check your student email daily. You can also forward your student mail to any other email account. Instructions can be found at: ([link to instructions](#)).

Email is the best way to contact me. The turnaround time is typically 24 hours, or less.

Email: [nways@necc.mass.edu](mailto:nways@necc.mass.edu)

When you send me an email, always include:

- Your name
- Your class (either course number or title, day, and time)
- A relevant subject

---

## Criteria for Grading

---

As mentioned above, this course aims to build a foundational knowledge base so that you may become a competent medical professional. Committing time and hard work goes a long way toward realizing your career goals. Further, when one receives good grades on exams it gives a certain satisfaction of a job well done.

**Exams** - Note, **Grading Criteria** are presented in the Learning Guides available on Blackboard. See the Learning Guides for specifics on the criteria for grading, suggestions on where to focus, and special exam activities. Exams are given bi-weekly in class.

|             |                                              |            |
|-------------|----------------------------------------------|------------|
| Exam #1     | Organization of the Human body               | 100 points |
| Exam #2     | Chemistry of Life, Part #1                   | 100 points |
| Exam #3     | Chemistry of Life, Part #2                   | 100 points |
| Exam #4     | Cytology                                     | 100 points |
| Exam #5     | Histology                                    | 100 points |
| Exam #6     | Integumentary system                         | 100 points |
| Exam #7     | Skeletal (Osseous) Tissue                    | 100 points |
| Lab Exam #1 | Histology Practical                          | 100 points |
| Exam #8     | Articulations                                | 100 points |
| Exam #9     | Glycolysis and Cellular Respiration          | 100 points |
| Lab Exam #2 | Laboratory Practical on Skeletal System      | 100 points |
| Exam #10    | Myology                                      | 100 points |
| Exam #11    | Nervous Tissue                               | 100 points |
| Exam #12    | Spinal Cord, Brain, Autonomic Nervous System | 100 points |

All exams are weighted equally. Always record your grades! You will want to do this to ascertain how you are doing in the class and be alerted if there is ever (there rarely is) something that appears questionable. You can always email me if you have a question.

**Grade Calculation** - The final semester grade assignment will depend upon completing all lecture exams and lab practicals. All exams are weighted equally. Of all the exams given, the lowest grade may be dropped except for the last unit. To calculate your grade: drop the lowest grade, do a simple average, and then use the Number/Grade Equivalency chart (below). You will know where you stand in the class regarding your grade at any particular point in time.

---

## NECC Grading System

---

|           |      |                                                                                                       |    |      |                                          |
|-----------|------|-------------------------------------------------------------------------------------------------------|----|------|------------------------------------------|
| A         | 4.00 | 93-100                                                                                                | C  | 2.00 | 73-76                                    |
| A-        | 3.70 | 90-92                                                                                                 | C- | 1.70 | 70-72                                    |
| B+        | 3.30 | 87-89                                                                                                 | D+ | 1.30 | 67-69                                    |
| B         | 3.00 | 83-86                                                                                                 | D  | 1.00 | 60-66                                    |
| B-        | 2.70 | 80-82                                                                                                 | F  | 0.00 | 59 or less; failure;<br>no credit earned |
| C+        | 2.30 | 77-79                                                                                                 |    |      |                                          |
| W         | 0.00 | Withdrawal from the course by the student<br>within the withdrawal period                             |    |      |                                          |
| NP        | 0.00 | Non-participation withdrawal grade assigned<br>by the instructor due to evidence of non-participation |    |      |                                          |
| IP (or I) |      | In progress. Extension granted due to extenuating circumstances                                       |    |      |                                          |

---

## Accessibility/Learning Disabilities

---

“Northern Essex Community College is committed to providing equal access to students with documented disabilities. To ensure equal access to this class (and your program) please contact the Center for Accessibility Resources & Services (CARS) or Deaf and Hard of Hearing Services (DHHS) to engage in a confidential discussion about accommodations for the classroom and clinical/practicum settings.

**Center for Accessibility Resources & Services:** Serving students with documented disabilities, such as learning disabilities, attention deficit disorders, autism spectrum disorders, brain injuries, chronic illness, low vision/blind, physical disabilities, psychiatric disabilities and seizure disorders.

**Deaf and Hard of Hearing Services:** Serving students who are Deaf or Hard of Hearing. Accommodations are not provided retroactively. Students are encouraged to register with CARS or DHHS at the start of their program.

**The Center for Accessibility Resources & Services is scheduling appointments Mondays through Fridays. Communications/meetings can be flexible based on student’s needs and may consist of the following communication options: Zoom, Phone, In-Person or Email.**

**To get started students may contact us as outlined below:**

- **Call the Center for Accessibility Resources & Services main number 978-556-3654 or email [centerforaccess@necc.mass.edu](mailto:centerforaccess@necc.mass.edu).**
- **Deaf and Hard of Hearing Services call 978-241-7045 (VP/Voice) or email [deafservices@necc.mass.edu](mailto:deafservices@necc.mass.edu).**
- **To request an Interpreter or communication access email: [interpret@necc.mass.edu](mailto:interpret@necc.mass.edu)**
- **Individual staff members can be contacted via email**

COVID vaccinations are required to be on campus. NECC is a mask optional campus, however, please consider wearing a mask on campus to mitigate the risk of catching and spreading COVID-19. For current information please visit: Coronavirus Information and Updates and Student COVID-19 Vaccination Requirement.

---

## Statement on Plagiarism and Academic Integrity

---

As students pursuing a career in the allied health professions, you will someday be in a position with medical or other important responsibilities. The health and well-being of the people you work with and for is paramount in importance. To operate competently in such positions, a strong foundation in anatomy and physiology is essential. Towards this end, exams serve as weigh points along your road to success. They indicate that your progress is proceeding well, and you are succeeding in your career goals at this time. But to assure that this process proceeds well, academic integrity and ethical behavior are vital.

To receive a grade that does not accurately reflect your knowledge and skill undermines your academic progress and puts you at risk of not fulfilling your goals or potentially harming others in your care. All

future course work and clinical activity will stand squarely on the shoulders of the knowledge base you are lying down now.

All work done on assessments and practicals must be your own. You are encouraged to work together, prepare together, and collaborate, but the work must be your own when an exam is done. Therefore, the following guidelines are established to help guide you in an ethical and legitimate approach to your assessments.

1. When exams are taken, no electronic devices may be on.
2. No web browsers or other sources of information may be used.
3. Violation of the above will result in one of the following
  - a “0” on the exam
  - an “F” for the Course
  - a meeting with the dean of students who would assess the infringement and follow college disciplinary procedures.

---

## NECC Outcomes Assessment (a College Statement)

---

NECC’s commitment to student success involves the evaluation of student work at the program, department, and/or campus levels to help ensure that students are achieving the learning outcomes identified by our programs and the college. This process may include the collection of such evidence as student classroom products or classroom-associated reports of student knowledge or skill demonstrations. All collected products will have any identifying information removed before they are reviewed. Results from these reviews are then aggregated to provide an overall view of students’ outcomes achievements. Assessments carried out at the program, department, and/or campus levels will not impact students’ course grades. The process of assigning grades will continue to be the responsibility of the course instructors. Any student who does not wish to have their products collected for program, department, or campus-level assessment can opt out by notifying their instructor.

---

## Getting Help

---

I am here to help you with this course and to make this an enjoyable and worthwhile experience. If you would like assistance outside of class, please send me an email to arrange an appointment on Zoom. Please do not wait until the last moment to ask for help. Remember, I am just an e-mail away.

### Additional Educational Services

**Tutoring:** NECC also offers FREE tutoring and other services at:

<https://www.necc.mass.edu/succeed/academic-support-services/tutoring-center/>

---

## Lecture Syllabus

---

Below is a tentative but probable schedule of topics and dates. The schedule could be adjusted should unforeseen circumstances occur. Note, the modules below always start on a Wednesday, and the assessment for that module can be anticipated the following Wednesday.

## Assignments

On a module start date, a particular Lecture Topic will be under consideration. Your assignment is to use the resources provided to you to begin mastering that topic in preparation for an exam on that topic. As mentioned above, read the Learning Guide found on Blackboard for particular guidance on how to approach the material. The Lecture Outline will provide structure and organization for the lecture content, and it provides room to take notes. Supplemental handouts will reinforce and expand on anatomical and physiological topics of particular importance or complexity. And in the lecture videos, I will walk you through all (with a few exceptions) the material.

For any particular module start date, this will also serve as the date of assessment for a previous module. So, before we start a new unit, the assessment of the previous module will be administered. For example:

On September 7 we will start the discussion on Chemistry of Life, part #1; but before you begin this unit, take Exam #1 on Organization of the Human Body. Please have exams done by midnight.

On September 11, we will start the discussion on Chemistry of Life, part #2, but before you begin this unit, take Exam on the Chemistry of Life, part #1. Please have exams done by midnight.

*Northern Essex Community College*

### *Anatomy and Physiology I*

#### *SCHEDULE – Fall 2024 – NECC – Bio 121 OFB*

Lecture: Presented Asynchronously Online

Lab: Presented Asynchronously Online

Below is a tentative but probable schedule of topics and dates. The schedule may be modified due to unforeseen circumstances.

→ **Exam Administration** - exams administered on **BLACKBOARD** will open at 8 am and must be completed by 11:59 pm. Please plan accordingly.

**NOTE:** the lowest exam grade may be dropped with the exception of the last three exams:

- Myology
- Nervous System Exams (2)

September 4 (Wed) → Start Module - Organization of the Human Body

September 7 (Sat) Exam - Organization of the Human Body  
→ Start Module - Chemistry of Life, Part #1

- September 11 (Wed) Exam – Chemistry of Life, Part #1 (Inorganic Chemistry)  
→ Continue the Chemistry of Life, Part #2
- September 14 (Sat) Exam – Chemistry of Life, Part #2 (Organic Chemistry)  
→ Start Module – Cytology
- September 18 (Wed) Exam - Cytology  
→ Start Module – Histology
- September 21 (Sat) Exam - Histology  
→ Start Module - The Integumentary System
- September 25 (Wed) Exam – The Integumentary System  
→ Start Module – Osseous Tissue
- September 28 (Sat) Exam – Osseous Tissue
- September 30 (Mon) Lab Practical #1 – The Histology Practical  
→ Start Module –Skeletal System, Part #1 (Axial)
- October 3 (Thurs) → Start Module – Articulations
- October 5 (Sat) Exam – Articulations  
→ Start Module –Skeletal System, Part #2 (Appendicular)
- October 7 (Mon) → Start Module - Glycolysis & Cellular Respiration
- October 10 (Thurs) Exam – Glycolysis and Cellular Respiration
- October 14 (Mon) Lab Practical – The Bone Practical (Axial and Appendicular)  
→ Start Module – Myology
- October 18 (Fri) Exam – Myology  
→ Start Module - Nervous Tissue
- October 22 (Tues) Exam – Nervous Tissue  
→ Start Module – Nerv. Sys. Spinal Cord & Autonomic NS
- October 26 (Sat) Exam – Nervous System (Spinal Cord & Autonomic NS)

# NORTHERN ESSEX COMMUNITY COLLEGE ACADEMIC CALENDAR, ABRIDGED

Fall 2024

- Official NECC [Academic Calendar](#)

↑ Above is a link to the **official** NECC Academic Calendar

↓ Below is an **abridged** rendition of the Academic Calendar

Full Semester Classes

**Session I: First Half Semester Classes**

Session II: Second Half Semester Classes

September 4- December 17

**September 4 - October 26**

October 28 - December 17

**Labor Day (College closed)**

**Classes begin**

ADD/DROP PERIOD Adding, Dropping or Withdrawing from a Course

To receive full refund for Full Semester and Session I

(classes that begin September 6-12), classes must be dropped  
by the close of business

September 2

September 4 (Wednesday)

September 4-10

September 11

**Withdrawal period begins for full-semester classes**

NS (No show) roster due by noon

Last day to withdraw with a "W" for Semester I

**Indigenous Peoples' Day (College closed)**

Assessment day (no classes)

**Final Exam period for day and evening classes for Session I Classes**

Session II classes begin

Add/drop period for Session II classes

To receive a full refund for Session II, classes must  
be dropped by the close of business

September 12

September 20

October 11 (Friday)

October 14 (Monday)

October 18

October 21-26

October 28

October 28 – November 1

November 2

Spring and Summer 2025 Advising/Registration begins

Veteran's Day observed (College closed)

NS (No show) Roster for Session II due by noon

Last day to withdraw with a "W" for Full Semester classes

And Session I Classes

November 4

November 11

November 12

November 27

Thanksgiving Recess begins at 5:00 pm (No evening classes)

No day or evening classes

Last day of classes before Final Exams

Final Exam period for day and evening classes for Full Semester classes

Fall Semester officially ends

November 28

November 28-30

December 10

December 11-18

December 17

## Distance Education Course Interaction Plan (Form DE-2)

---

This form is to be completed by the faculty of record. Students enrolled in this distance education course shall receive a copy of this completed form.

**Course Title:** *Anatomy and Physiology I*

**Faculty:** *Noel Ways*

**Email:** *nways@necc.mass.edu*

In-class Meetings: No

Asynchronous Course: Yes

Synchronous Course: No

**Asynchronous:** This form of distance education is characterized by an emphasis on “learning on demand” or “as needed communication” between students and faculty from multiple locations at times convenient to participants.

**Synchronous:** This form of distance education entails the use of live, two-way communication among and/or between students and faculty in a scheduled or “fixed” point(s) of time(s), much like classroom-based instruction.

**In-class:** This form of education does not involve distance learning. Students and instructors meet in class on campus on fixed days and times and locations.

This course may include, but not be restricted to, the following interactions:

|                                                  | YES                      | NO                       |
|--------------------------------------------------|--------------------------|--------------------------|
| 1. in person meetings on campus                  | <input type="checkbox"/> | ✓                        |
| 2. in person meetings (via Zoom), by appointment | ✓                        | <input type="checkbox"/> |
| 3. telephone interactions                        | <input type="checkbox"/> | ✓                        |
| 4. electronic interactions (email, internet ...) | ✓                        | <input type="checkbox"/> |

If yes, dates, times, places are to be specified.

Students are required to engage in the following interaction(s) for successful completion of this course:

Student-instructor interactions occur weekly via email and announcements. Should a follow-up meeting be necessary, an online zoom meeting will be scheduled at a mutually acceptable time.

A discussion board is available as an optional mode to promote student-student and student-instructor interactions.
