

Blood Vessels

Chapter 12, pages 270 - 286

1. Circulatory Routes (Page 276)

- A. Pulmonary Circulation
- B. Systemic Circulation

2. Vessel Types and Definitions (Page 271 - 272)

- A. Artery
- B. Vein
- C. Capillaries

3. Structure of the Vessels (Page 270 - 271)

- A. Tunica Externa
 - i. Fibrous Connective Tissue
- B. Tunica Media
 - i. Muscle
 - ii. Elastic Fibers
- C. Tunica Interna
 - i. Endothelium

Human Body in Health and Disease Student Outline – Blood Vessels

4. Vessel Differences (Pages 270 - 271)

A. Artery

B. Vein (See also Page 274, figure 12.16)

C. Capillaries (Pages 271 - 273)

5. Capillary Structure and Function (Pages 271 - 273)

A. Precapillary Sphincter

B. Fluid movements

i. Osmosis (Pull out handout on osmosis)

ii. Hydrostatic Pressure (Pull out handout on Fluid Return)

a. Viscosity

Human Body in Health and Disease Student Outline – Blood Vessels

6. Blood Pressure (Pages 274 - 276)

A. Pressures

- i. Systolic Pressure
- ii. Diastolic Pressure

B. Factors that influence Blood Pressure (Pages 274 - 276)

- i. Blood Volume
- ii. Resistance
- iii. Viscosity

C. Blood Pressure Control (Pull out handout on Blood Pressure)

- i. Vasodilation
- ii. Vasoconstriction
- iii. Vasomotor Center
- iv. Cardioregulatory Center

Human Body in Health and Disease Student Outline – Blood Vessels

7. Hepatic Portal System *Pull out handout on Hepatic Portal System*

(Also, Figure 12.24, page 285)

Do these on your own:

8. Blood Vessel Disorders (Pages 286 - 287)

A. Aneurysm

B. Atherosclerosis

C. Hypertension

D. Varicose Veins
